

WOOD PANELING

WALLPAPER

Wallpaper is a dynamic material that can be used to define any space. Whether you want to go moody, floral, abstract, or textured, you can find an application that best works for you.

NATURAL STONE AND TILE

Stone, porcelain, or ceramic tiling can be used for more than your typical kitchen backsplash and bathroom materials. Try applying it as a feature wall or interior post by wrapping it around a plain white wall.

PRIVACY SCREENS

Want to open up your space while still having room separation and definition? Privacy screens act as stylish room partitions that provide additional light, airflow, and versatility.

PAINT

Don't be afraid to go bold! Paint an accent wall (or two) to add some flare to your favorite spaces. Whether that means darkening a moody bathroom or brightening a reading nook, color can greatly enhance your daily usage of your room!

MOLDING & WAINSCOTTING

Molding, trim, and wainscoting add rich depth and texture to any room. Try wainscoting at waist-height to define your seating area, bathroom, bedroom, or hallway!
